

- Washers which prevent the cracking or scratching of acrylic panels, etc., due to screw tightening load when fixing panels with flat head machine screws.
- Available for Cross Recessed Flat Head Machine Screws in accordance with JIS B 1111, and Hexagon Socket Countersunk Head Screws in accordance with JIS B 1194.
- Supports panel thickness of 3 mm and 5 mm.
- Because the L dimension is longer than the panel thickness, tightening load is not applied to the panel when tightening the screws.
- Aluminum. When the material is to match the aluminum frame.
